IMAGINE Celebrates 10th Anniversary

Charlotte, NC – Technology Partners, Inc. (dba IMAGINE Software), a leading provider of medical billing technology, announces the celebration of its 10-year anniversary.

Since its founding in 2000 by Charlotte-based entrepreneur Sam Khashman, Technology Partners, Inc. has grown into a nationally recognized company in the radiology segment and the healthcare arena, offering a comprehensive product line for medical business management through the IMAGINE software platform, including IMAGINeradiology™, IMAGINEappliance™, IMAGINeris, IMAGINE I-Dashboard, and IMAGINE truICE.

"IMAGINE started out 10 years ago as a vision and has evolved into a truly successful leader in its space that continues to exceed everyone's expectations," said Khashman, president and CEO of Technology Partners, Inc. "We are all very proud of this achievement and thankful to our clients, partners, and employees that helped get us to where we are today."

Originally incorporated and launched as a workflow and document imaging company, Technology Partners, Inc. began to focus on the healthcare IT sector after successfully developing enterprise-wide analysis and financial systems. The first commercialized products included HCFA processing and insurance denial mitigation systems. These systems were coupled with existing practice management and physician back office applications that were previously based on older technology, causing the need to develop its own physician enterprise billing system, IMAGINeradiology™, while leveraging the core competencies and technologies around document imaging, workflow efficiency and process automation. In late 2003, IMAGINeradiology™ was released as the first Windows-based practice management system that was specifically built for high volume and transaction intensive physician practices and billing offices, setting the standard for industry improvements.

To commemorate its 10-year anniversary, IMAGINE will offer a variety of new initiatives and events throughout 2010, including a complimentary client training webinar program, a new community website for all IMAGINeradiology™ users, community service efforts, and a 10-year anniversary software package upgrade edition.

"Our continued focus on our customers is one of the main reasons why IMAGINE has been so successful, and we want to ensure our clients reap the benefits of this 10-year milestone celebration," commented Khashman. "While our company has grown, our commitment to our clients in providing even higher standards for quality support and innovative technology remains solid. We are excited for the next 10 years to come."

About Technology Partners, Inc. (dba IMAGINE Software) and IMAGINeradiology™
