IMAGINE Software Announces New Contract, Abingdon Radiology Services

Charlotte, NC – Technology Partners, Inc. (dba IMAGINE Software), a leading provider of medical billing technology, announces new client Abingdon Radiology Services (ARS) has chosen the IMAGINeradiology™ practice management suite for its billing and collection needs.

Based in Abingdon, Virginia, ARS has provided complete diagnostic and interventional radiology services to the area for 40 years. The practice began its search for a new billing system by looking for companies that offered several necessary performance features its current system did not employ, including automation, reporting tools, and ease-of-use.

“We needed a system that was designed specifically for radiology practices with radiology-based software, which IMAGINeradiology™ provided,” said Connie May, business manager for ARS. “During our decision-making process, we were able to visit a nearby IMAGINE client site to see first-hand how IMAGINeradiology™ performs on a daily basis. This was extremely helpful for us. Overall, we looked at three or four different companies, but IMAGINE was the only one that really stood out and had the advanced technology we were looking for.”

“Upgrading to the latest technology is one of the main reasons our customers choose IMAGINeradiology™,” said Rocky Sebastian, regional account executive for IMAGINE Software. “We were pleased to be able to offer Abingdon Radiology Services a system that meets their needs for superior automation, integration and reporting, and we are honored to include them in our ever-expanding client base.”

“We are extremely happy with IMAGINeradiology™ and the support we have received, and look forward to continue utilizing its capabilities in the future,” stated May.
